

IRRIGATION RATE SCHEDULES

AVAILABILITY

This schedule is available to existing irrigation accounts at points on the Cooperative's interconnected system where existing facilities of adequate capacity and desired phase and voltage are on the premises to be served, and additional investment by the Cooperative for new transmission, substation or terminal facilities is not necessary to supply the desired service. Service under these irrigation schedules is not available to new installations and is applicable only to existing installations currently being billed under this rate. Special exemptions may be made by the Cooperative on a case by case basis. Service is subject to established policies and procedures of the Cooperative.

APPLICABLE

Applicable for irrigation and drainage pumping used principally for food production, the cultivation of crops, mining and quarry operations and any direct but incidental electric use necessary to support these activities.

TYPE OF SERVICE

Single-phase or three-phase, 60-cycle, alternating current at available secondary voltage measured through a single meter.

DETERMINATION OF BILLING DEMAND

The billing demand shall be the maximum kW demand established by the member for any period of 15 consecutive minutes during the month for which the bill is rendered as indicated or recorded by a demand meter and adjusted for power factor described herein.

DETERMINATION OF HORSEPOWER AND HORSEPOWER CHARGES

The horsepower for billing purposes shall be the greater of the sum of all connected motors' horsepower ratings as indicated on the manufacturer's nameplate or established in January by the maximum billing demand determined by the 12 months in the previous calendar year multiplied by 1.341.

POWER FACTOR ADJUSTMENT

The member agrees to maintain unity power factor as nearly as practicable. Demand charges will be adjusted for average power factors lower than 95% for those services where the Cooperative has installed power factor measuring equipment. Such adjustments will be made by increasing the measured demand 1% by which the average power factor is less than 95% lagging.

DETERMINATION OF RATE SCHEDULE

Accounts will be reviewed to determine the appropriate rate schedule as deemed necessary by the Cooperative.

POWER COST ADJUSTMENT

This rate shall be subject to the Cooperative’s Power Cost Adjustment Schedule.

TAXES AND/OR FRANCHISE FEES

This rate shall be subject to all taxes and franchise fees levied or imposed by laws or ordinances which are incurred by the Cooperative.

Irrigation credits will apply as determined by the Idaho State Tax Commission.

TERMS OF BILLING AND PAYMENT

Payment for rendered service is payable by the stated due date and becomes past due if not paid by that date.

Members requesting a reconnection of service within 12 months of requesting a disconnection at the same service location shall be responsible for paying all applicable charges that would have been incurred during the months the service was disconnected. When determining applicable energy charges, no consumption will be assumed during the months the service was disconnected. These charges will be in addition to any other outstanding charges or fees.

MONTHLY BILLING RATES

Small Irrigation Rate Schedule		I110 & I130	
I110	Service Availability Charge:	Less than 25 HP	\$18.15 per month, or
I130	Service Availability Charge:	25 HP to 75 HP	\$36.30 per month, plus
	Energy Charge:	May – October billing statements	\$0.055 per kWh, or
		November – April billing statements	\$0.099 per kWh

Large Irrigation Rate Schedule**I210**

HP Charge: \$16.50 per HP annually billed in 6 even installments on the May through October billing statements, plus

Demand Charge: All kW at \$1.38 per kW, plus

Energy Charge: May – October billing statements \$0.055 per kWh, or
November – April billing statements \$0.1045 per kWh

Additional Terms of Service: Applicable to locations with established horsepower which are greater than 75HP.

These rates are effective for billings rendered subsequent to October 1, 2016.
